

NOUREDDINE ISSA

SUMMARY

Mechanical Engineer with 9+ years of experience, applying my skills to generate innovative solutions that require development or sustainment of new and improved techniques, procedures and products. Demonstrated leadership skills that optimize collaboration between departments to produce high-quality work. Responsibilities include **technical fault finding and repair**, planning, designing, project studying, and conducting and evaluating to meet project objectives in a timely, cost-effective manner. Specialty in Team Building, Preventive Maintenance & Scheduling, Training, and **providing highest-quality customer support service**. Possess strong communication and presentation skills and can handle multiple projects & activities simultaneously while ensuring compliance with project technical specifications, international standards, and OEM procedures and specifications. Full awareness of cultural sensitivities, excellent interaction skills with multinational teams from various backgrounds to sustain long-term trust and business relationships. Passionate about the field. **Particular experience maintaining and repairing heavy machinery including forklifts and other plant equipment.**

RELEVANT WORK EXPERIENCE

Freelance Maintenance and Technical Engineer *Beirut - Lebanon* **Feb 2020 – Present**

- Performing maintenance & troubleshooting gensets and heavy-duty equipment
- Performing electrical power & control panel problem solving and repair
- Repairing hydraulic and transmission systems

Ahmad Rajab Jubaili *“Quality and Maintenance, Technical Engineer” Beirut - Lebanon* **Apr 2017 – Nov 2019**

- Troubleshoot and performed maintenance of heavy equipment (including Forklifts and plant equipment) as well as generators
- Provided quality control of work presented to customers and on site evaluation
- Drafted daily and monthly reports to head departments
- Provided spare parts for customers upon checkups and presented price estimation
- Full project handling from case study, price breakdowns, and installation
- Supervised over five teams consisting of two, a mechanic, and electrician
- Followed up with customers for after sale services and complaints

Anthony Rock Ltd. *“Field & Design Engineer” Port Harcourt - Nigeria* **Jan 2015 – Feb 2017**

- Oversaw, designed, installed and maintained all kinds of mechanical machinery and heavy equipment (Forklifts used in the plant, and vehicles) in addition to tools and components like pipeline design & construction
- Prepared layout and specifications for ventilation air conditioning systems, external and internal gas and oil distribution systems, as well as domestic hot water services distribution and plant layouts
- Provided the client with exact demanded specifications, within budget and on time
- Reviewed technical data and illustrations, understood potential problems, and relayed solutions and feedback to working crew on the problem
- Inspected the existing plant equipment at site related to piping & received materials
- Prepared weekly and monthly documentation in term to operational Status Reports
- Attended seminars & meetings with consultants & contractors
- Confirmed work permit & required manpower for the project, considering workload, overtime, construction methods and possibilities of unusual circumstances
- Supervised piping & structures construction activities, as specified to meet work of high quality standard
- Coordinated with QA/QC department to perform hydro testing activities
- Assisted Operation Manager in collecting operational data pertaining to work performance guidelines & productivity
- Drafted monthly reports to management and arranged necessary liaisons with other departments in order to

- minimize future potential claims
- Tested & commissioned all MEP systems up to compliance standard and specifications

Serena Rock Ltd “Site Operation Superintendent” Ondo - Nigeria

Feb 2014 – Jan 2015

- Planned, directed drillers and blasted resources in a safe and cost-effectiveness manner
- Organized and directed Earthwork teams in excavation, hauling & dumping of materials
- Ensured that the quarry ran smoothly, met production quotations & the operation was carried out in a profitable & efficient manner, ensured safe workmanship and oversaw equipment workability condition
- Responsible for maintenance & inspection of the equipment, vehicles and forklifts used at quarry
- Responsible for the workshop for all kinds of repairs, overhauling & fault finding in electrical, hydraulic, transmission, using software's systems on site for forklifts and all machinery
- Monitored availability of spare parts, oil & diesel consumption & kept records
- Minimized cost by applying different techniques
- Developed and promoted good communication skills and professional relationships between all team members at all levels of employees at site

Hitech Construction Company “Plant Engineer” Lagos - Nigeria

Jun 2013 – Jan 2014

- Inspected work and gave instruction for H.D. equipment operators at site
- Responsible for all repairs & maintenance of all Heavy Duty Equipment
- Performed inventory and stock management analysis
- Involved in the overhauling of transmission & hydraulic pump systems for machines that have broken down
- Supervised and confirmed work completion in central workshop
- Sent monthly reports to Plant Manager & Project Manager
- Trained and directed Operators on how to use machines, considering safety precautions
- Conducted technical/personal development courses to improve team performance
- Contacted & followed up with suppliers to get the required spare parts according to machines part numbers and models

- Preparing balance sheets for branches and calculating profits
- Drafting daily and monthly financial reports, and providing updates regarding finances to leadership
- Preparing files in and files out for vendors

TRAINING

Industrial & Commercial International Enterprise “Training Program” Beirut, Lebanon **Jun 2008 – Sept 2008**

- General aspects of HVAC Systems. (Chillers, Designs and BOQ's, draft drawings, etc.)
- General aspects of piping / sanitary & Plumbing Systems. (Boilers, heaters, etc.)
- General aspects of Fire Fighting Systems.
- Load calculation for Heating & Air Conditioning, Calculation of Pressure Drops & Static Pressures, Mechanical drawing analysis, design & details.
- Site visits, installations, modifications, testing, maintenance & commissioning of mechanical systems.

M. Saleh Est. “Training Program” Saida, Lebanon

Aug 2007 – Sept 2007

- Practice specialized in Perkins and Lister Putter and fuel supply systems (pumps and injectors)

Said Gomaa Est. “Training Program” Saida, Lebanon

July 2006 – Aug 2006

- Performed maintenance specialized in caterpillar and heavy duty equipment in general

EDUCATION

B.E. in Mechanical Engineering

2004 – 2009

Beirut Arab University

CERTIFICATIONS

- Practical piping and Plumbing Engineering certification
- Fundamentals of HVAC & R systems Ashrae certification
- PLC programming & electrical Systems Certification

SKILLS

- Piping Installation, Construction/installation & commissioning
- Oil and Gas relevant
- Mining & Quarry
- Industrial & production
- Quality control & assurance
- Engineering Designs & Services
- **Repairs & maintenance of heavy equipment**
- Project and inventory management
- Ultrasonic flow meter
- Fluid, Gas dynamics & mechanics

- **Business development**
- **Clients support services**

COMPUTER SKILLS

- AutoCAD 2D & 3D
- MS office suite
- Autodesk Inventor
- Mat lab and C programming
- Service information system
- Plumbing designer & pipe Sizing
- Project Planner
- Load calculation & duct sizing
- AHU & FCU designer
- Machine design software
